TECHNICAL SKILLS

Proficient: React.js, JavaScript (ES5 + ES6), jQuery, Bootstrap 4, HTML5, CSS3, Flexbox, AJAX, Fetch, RESTful APIs

Experienced: Gatsby.js, Node.js, Express, PHP, PostgreSQL, MySQL, GraphQL, Material UI, WordPress

Tools: Git/GitHub, AWS, Netlify, npm, Webpack, Babel, Apache, Docker, Chrome Dev Tools, Postman, Meistertask, JIRA, Figma, Photoshop, Command Line, Visual Studio Code, DB Designer, Agile Methodology

PROFESSIONAL EXPERIENCE

Web Developer, *NowRx*   2020 – Present
- Develop and maintain WordPress pages based on mock illustrations and assets provided by marketing department using JavaScript, HTML5, CSS3, and PHP
- Research and incorporate coding best practices to ensure optimal performance and reduced load times
- Build responsive layouts and optimize user experience resulting in higher conversion rates
- Identify, document, and fix existing bugs with website layout and functionality

Web Development Teaching Assistant, *LearningFuze*   2020 – Present
- Assist with teaching LearningFuze students JavaScript, jQuery, React.js, HTML5, and CSS3
- Explain coding best practices and debug applications written by LearningFuze students
- Support students outside of regular scheduled hours to clarify concepts such as programming fundamentals and provide mentorship on complex problem solving

Account Manager/E-Commerce Strategist, *Lucid Fusion*   2018 – 2019
- Collaborated with Project Management team to provide support and ensure alignment on timelines, deliverable expectations, completion dates, project scope, and team needs
- Participated in Quality Assurance/Quality Control (QA/QC) review sessions on all deliverables before providing to clients

Senior Enterprise Account Manager, *Mopro*   2015 – 2018
- Led technology, design, and Account Management team to deliver digital products, meet client needs, scope projects, and exceed monthly revenue goals
- Managed multiple small to mid-sized enterprise clients' web content lifecycle, website design and UX to identify solutions and provide world class service as Senior/Team Lead

APPLICATIONS DEVELOPED

Spontaneous.ly, *GitHub* 🔗 | *Live* 🔗
- **Led a team** to develop a **full-stack mobile-responsive CRUD app** where users can create an account, search for activities, make a reservation, track points gained by attending, and spend points to change filter criteria
- **Designed wireframes** using **Figma** and **database schema** using **DB Designer** to provide clarity to team on final design, expected functionality, and database structure
- **Developed front-end and back-end** for **"user can view all activities"** feature, which renders content to the **DOM** from **query parameters** in the URL generated by **React Router**
- Built using **React.js**, **React Router**, **JavaScript (ES6)**, **PHP**, **MySQL**, and **Bootstrap 4**

EDUCATION

University of California Riverside, *B.S. in Business Administration*

LearningFuze, *Accelerated Web Development Program*
- 70+ hours of programming per week for total of 800+ hours of programming in a simulated work environment with project deadlines and mentorship from senior developers
